Tanazza Muskan Mirza

AIML engineer with expertise in machine learning, deep learning, and full-stack AI systems. Skilled in hands-on development, research, and solving complex problems within challenging constraints. Passionate about creating impact and contributing to innovation.

EDUCATION

- **Bachelor of Technology – Computer Science & Engineering (AIML)**
  Manav Rachna University | 2023 – Present
  CGPA: 9.11 / 10.00
- **Intermediate [12th grade]**
  Manav Bharati India International School | March, 2022
  Percentage: 90.4%
- **Intermediate [10th grade]**
  Manav Bharati India International School | March, 2020
  Percentage: 88%

INTERNSHIPS

Web Development & Front-End Intern — CODSOFT
Remote | June, 2025 – July, 2025

- Developed a full personal portfolio website using HTML, CSS, and JavaScript and built a landing page for a book service ("Ferns & Quills") and a functional calculator. Gained practical experience in structured UI design and responsive layouts.

AWARDS & ACHIEVEMENTS

- Received Dean's list award.
- First place in HackX hackathon.
- IEEE Event head after 2 years of participation [2025-present].
- Head of Felicia Art Society under Student Welfare [2024-2025].
- Member of Manav Rachna University Centre of Peace and Sustainability from 2022-2023 for a semester.

TRAININGS & CERTIFICATIONS

- Google – GenAI for developers.
- NPTEL – Design Thinking, Social networks, Innovation Business Model and Entrepreneurship
- LinkedIn - Machine Learning Basics, Deep Learning Essentials

LANGUAGES

English (Fluent) | Hindi (Fluent) | Spanish [A1 Level]

PROJECTS / RESEARCH

- Hybrid AI Video Editing Application (Major Project/ongoing) -
Designing a B2B/B2C smart web app with AI features such as auto-trim, transcript editing, multi-language subtitles, AI voice-over, scene detection, and face tracking.
Working under investor guidance; future plan includes mobile app version for short and long form content to provide ease and flexibility to the user.

- PocketAI (ongoing)- A low resource, environmentally sustainable solution created to provide ai modules across multiple disciplines. Integrates hardware system with intelligent systems to provides ease of use and a complete AI module tailored to departmental needs.

- AnzenAI: An AI assimilated security system that provides safety in construction sites to workers and allows for the safety check including PPE, posture and fall/hazard detection to alert authorities in real-time, hence, providing a quick alert and response system.

- Who's That K9: Dog Breed Classification using Vision Transformer.
Developed a hybrid CNN + ViT model and an enhanced DeiT model for image classification of dog breeds.
Built a fully functional StreamLit app for classification and care tips.
https://github.com/tanazzamuskan/Dog_Breed_ClassifierANN

- CogniFit: Mental Health Prediction (Unsupervised ML) - Developed a PCA + KMeans clustering model to predict mental health clusters based on lifestyle attributes
Built a fully functional Streamlit interface for user assessment and visualization.
https://github.com/tanazzamuskan/CogniFit

SKILLS

Programming: Python, C++, HTML, CSS, JavaScript
Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, KMeans, PCA
Deep Learning: CNNs, RNNs, GRU, Vision Transformers (ViT), Transfer Learning (learning)
Tools/Frameworks: TensorFlow, Keras, PyTorch
Other Tools: Jupyter Notebook, Anaconda, Streamlit, GitHub, VS Code

HOBBIES & INTERESTS

Reading Books, Painting, Puzzles, Photography.
